

12300 Series DLT

Digital Level Transmitter

*The New Generation
of Level Instrument*

- *Linkageless Sensing Mechanism*
- *Push-button Operation*
- *Zero & Span Numeric Calibration*
- *Automatic Calibration*
- *Low Cost of Ownership*

Diagnostic Services

*The Most Effective
Preventive / Predictive
Control Valve Maintenance
System..!*

- 
- ▶ *Fast microprocessor-based data acquisition system*
 - ▶ *Internal HART[®] modem for communication with HART devices*
 - ▶ *Internal FOUNDATION[®] Fieldbus communications hardware & software*
 - ▶ *Identify trends through comparison of current & past valve signatures*
 - ▶ *Analyze key valve characteristics, including hysteresis, deadband, & stroking speed*
 - ▶ *Remotely analyze diagnostic signatures using companion software program*

LINCOLNLOG[®]

The Premier Liquid Letdown Valve

**UNIQUE
AXIAL FLOW TRIM
FOR SEVERE SERVICE
APPLICATIONS**

- High pressure drops
- Cavitation and flashing
- Entrained solids
- Abrasive or corrosive fluids
- High turn down requirements
- Harsh environments

**THE ORIGINAL
... And Still a Notch Above**

The Optimum Solution... In Control

Eccentric Plug...

The First...

The Best...

And Getting Better..!

FEATURES

- High nickel alloy materials
- Ceramic trim
- Jacketed construction
- High capacity version
- Slurry package
- Cryogenic service configuration
- Enhanced throttling control performance

BENEFITS

- Low life-cycle costs
- Cost effective design
- Modular "system" configuration
- Enclosed Linkages

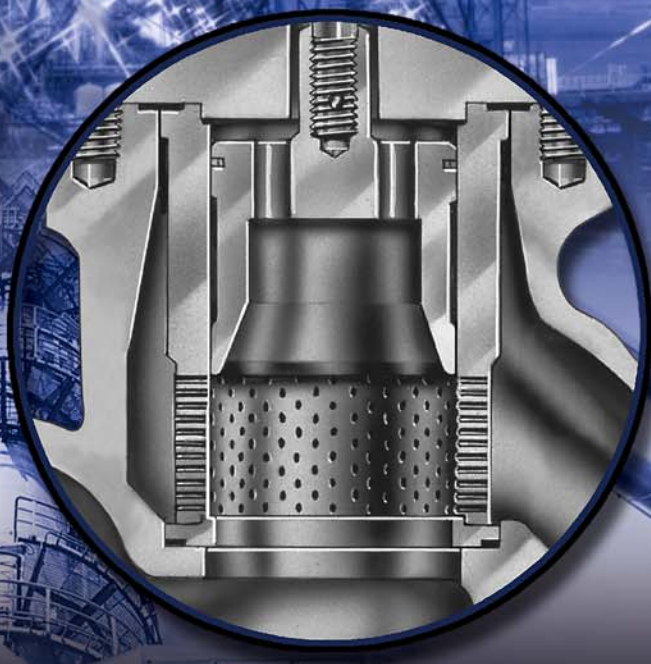

Masoneilan®

41005 Series Control Valves

Maximum Control Performance

- Heavy Duty Cage-Guiding
- Smooth Pressure Balanced Operation
- High Pressure Drop Capability
- Excellent Dynamic Control
- Efficient Anti-Cavitation
- Effective Noise Attenuation
- Field Proven Severe Service Solution
